

Information on this product is currently data deficient.

For further information, please contact contraception@chesterzoo.org

EGZAC endeavours to provide correct and current information on contraception from various sources. As these are prescription only medicines it is the responsibility of the veterinarian to determine the dosage and best treatment for an individual animal under their care. EGZAC can therefore not be held liable for any injury, damage or contraception failure in an animal. EGZAC recommends that individuals managed within breeding programmes should not be contracepted without the agreement of the programme coordinator.
